

NEIL

Ludovica e Roberto Palomba,

When he walked on the moon in complete absence of gravity, Neil Armstrong forever consecrated the concept of lightness. For the new Neil sofa designed for Driade, Ludovica and Roberto Palomba drew their inspiration from the same concept of weightlessness. This sofa stands out for its simple lines and compactness and contains a totally unexpected soul: without altering the structure of the sofa, its elastic padding encloses a technological framework that makes the arm and backrests flexible, favouring complete relaxation. A new, intimate refuge featuring extremely comfortable seats on which even a small nap comes as easily as walking on the moon.

Made of a solid fir wood structure and multilayer panel, plastic foot. The structure in its components, back, base and armrest is completed by an elastic belt for maximum comfort. All upholstery consists of polyurethane rubbers with variable density and resin with different weight. Removable fabric or fixed leather cover. Indoor use only.
