

GREEKY

Analogia Project,

With ironical sophistication, Greeky offers a modern interpretation of ancient greek pottery that by tradition narrates the epic gestures of gods and heroes. Decorations are harmoniously converted into patterns that wrap around items, enhancing their curved and harmonious shapes. The collection includes three classical elements, an amphora vase and a large table centre developed in two colour variants, matt white and sand grey. A collection of impressive items with a powerful decorative calling.

Ceramic vase white and black color.
