

NEMO SOFT TOUCH

Fabio Novembre,

Nemo Skin Tone are eco-friendly because they are made using new generation paints. Driade continues its research towards a production that foresees the lowest environmental impact thanks to the use of water-based matt acrylic paints that give the product a particular resistance to the use, to the light and to atmospheric agents as well as an aesthetic appearance, a soft and "silky" touch that combines perfectly with the new colors in human skin tones

Soft touch opaque varnished polyethylene. Indoor/outdoor use.
