

NEMO

Fabio Novembre,

Fabio Novembre uses furniture design to tell intense and fascinating stories in which the protagonist is often the human figure. This human figure is capable of becoming abstract and universal, able to propose a mythic beauty as occurred in greek art. So that Nemo, a face with classic features, is hollowed out to create an inhabitable space. The result is a head-armchair to be lived from the inside. Like a mask, it simultaneously conceals and reveals its inhabitant.

Fixed monobloc made by rotational molding. Indoor/outdoor use.
