

LORD YO

Philippe Starck,

At its beginning, lord yo was simply a polypropylene easychair with an aluminum structure, now it's an icon. Recognized and recognizable anywhere and by anyone. It took Philippe Starck to carry out such an extraordinary stunt, built with soft curves and raised back, almost a throne, and slightly bent legs. Then to think about covering it, sometimes, with a white slipcover that, instead of hiding, reveals. Unique even within the design corpus of Philippe Starck.

Aluminum structure. Polypropylene shell. Indoor/outdoor use.
