

## SISSI

Ludovica e Roberto Palomba, Sissi is a sculptural, very versatile, self-centred and contemporary piece. "Its modern design winks cheekily at the past and at the female world. The merging and intersecting rings look as if they have been bent by the hand of the viennese craftsmen, whom since over a century ago, would offer the world an elegant and design archetype. The connections, linked in such a sensual way, turn Sissi into a refined and sculptural piece, just like the ultimate viennese chair - famous for its wooden curves- it is inspired by. Just like a confident, self-assured women changes her clothes to suit her mood, this chair is complemented by an essential part of its design, the seat cover." Ludovica and Roberto Palomba.

Monobloc stackable in polypropylene copolymer with glass fiber, natural polyethylene semisoft feet red color. Also available with seat cover. Indoor/outdoor use.
