

ZAGAZIG

DriadeLab,

A collection of coffee tables in various sizes created as a set of two which can stand by themselves in the centre of the living room or be used as side tables, as desired. Their shapes are irregular and dynamic, available in two different heights and sizes. Just like the ziqqurat cabinet, each top comes in three different patterns made of digital printed bilaminate with contemporary, very distinctive, designs: vintage collages, optical decors, textures that interpret the weaves suggested by the creativity of current trends. The frame is in gold-coloured tubular steel. This nostalgic yet trendy choice adds elegance and charm to these pieces.

Structure in polyester powder coated steel rod. Top in bi-laminate and graphic with striped. Indoor use only.
